Imprimis Pharmaceuticals (Nasdaq: IMMY) is a pharmaceutical company dedicated to delivering high quality and innovative compounded preparations to physicians and patients at affordable prices. We are pioneering a new commercial pathway in the pharmaceutical industry, using compounding pharmacies for the formulation and dispensing of high quality, compounded formulations. We are focused in many therapeutic areas including ophthalmology, urology, sinus and integrative medicines.

ImprimisRx pharmacies are committed to delivering customized and other compounded formulations to physicians and patients TODAY at accessible prices.

We provide high quality medications to patients and physicians. We have a full customer service department dedicated to providing patients with assistance in obtaining coverage for their eligible compounded formulations and acting as an advocate throughout the process.

Our Compounded Formulations May Benefit Your Patients With:

- ✔ Improved patient experience with little to no mixing
- ✔ Increased convenience with sterile pre-filled syringes
- ✔ Ease of dosing
- ✔ Improved patient compliance
- ✔ Ability to customize formulations for individual needs
- ✔ Reduced costs to patients and physicians

THERAPEUTIC AREAS

We specialize in a variety of condition areas and focus on developing compounded formulations for individual patients. A sample of the areas where physicians have requested specific formulations include:

Autoimmunity

- Antimalarials
- Botanicals
- Multi-vitamin and multi-mineral intravenous therapies
- Opioid Antagonists

Chronic infectious diseases

- Vitamins
- Chelating Agents
- Antioxidants
- Vitamins and minerals
- Surfactants
- Myers' Cocktail

Dermatologic conditions

- Acne therapies
- Anesthetic gel combinations
- Nail fungus topical treatments
- Psoriasis and eczema treatments
- Hair loss formulations
- Wart therapies

Endocrine/metabolic health

- Vitamins
- Botanicals

Neurodevelopmental disorders

- Gluten-free and casein-free preparations
- Gut dysbiosis therapy
- Nutritional therapy
- Transdermal therapy

Oncology

- Antimalarials
- Botanicals
- Vitamins

Sinus conditions

- Intranasal formulations
- Oral combination treatments
- Sublingual formulations

Men & women's health

- Estrogen/testosterone
- Interstitial cystitis oral treatments
- Intracavernous injections for erectile dysfunction

The formulations contained in the catalog are just a sample of the compounded preparations that may be formulated for individually identified patients pursuant to a prescription or order from a physician. The physician, patient, and pharmacist should determine the compound that is most appropriate for the particular patient.
