

The enclosed prescription medication is made by ImprimisRx[®], a pharmaceutical compounding company that specializes in customizing medications to meet unique patient and practitioner needs. This document is for professional use only. This document contains information related to the individual ingredients contained in the above described compounded formulation. Use of this formulation has not been reviewed by the U.S. Food and Drug Administration (FDA) for any indication. This information may not cover all possible uses, directions, side effects, precautions, allergic reactions or drug interactions. ImprimisRx dispenses compounded medicines to licensed practitioners and individually identified patients with valid prescriptions. Compounded medications are not reviewed by the FDA for safety or efficacy. ImprimisRx does not compound copies of commercially available products. References available upon request.

Product Name:

Dexamethasone Sodium Phosphate

Moxifloxacin HCl

Ketorolac

Intraocular Solution for Injection
Preservative-Free

	Dexamethasone Sodium Phosphate	Moxifloxacin HCl	Ketorolac Tromethamine	
Possible Indications	Postoperative Inflammation Allergic Conjunctivitis Inflammation of Anterior Segment of Eye Keratitis, Optic Neuritis, Iritis Sympathetic Ophthalmia	Bacterial Conjunctivitis	Postoperative Eye Pain Transient Burning and Stinging in the Eyes	
Possible Adverse Effects	Conjunctival Irritation Burning and Stinging Sensation Fever Eye Irritation and Infection Airway Obstruction Anaphylaxis Angioedema Circulatory Shock Blindness Post-Injection Flare Wound Healing Suppression Anaphylaxis Corneal Perforation Headache Subcapsular Posterior Cataract Ocular Hypertension Optic Nerve Damage Visual Field Defect	Conjunctival Irritation Fever Eye Irritation Airway Obstruction Anaphylaxis Angioedema Circulatory Shock Dyspnea Facial Edema Fungal Superinfection Laryngeal Edema Loss of Consciousness Pharyngeal Edema Pruritus Superinfection Urticaria Pigment Dispersion Syndrome	Burning Sensation of Eyes Stinging of Eyes Conjunctival Hyperemia Corneal Edema Corneal Erosion Corneal Infiltrates Corneal Perforation Corneal Thinning Eye Pain and Irritation Headache Hypercreativity Reaction Iritis Ocular Edema Ophthalmic Inflammation Superficial Eye Infection Superficial Keratitis Tissue Damage	
Dosing	Intracameral doses of moxifloxacin in excess of 500mcg may be associated with inflammatory reactions and corneal endothelial toxicity <ul style="list-style-type: none"> Use no more than anterior chamber volume of roughly 0.25ml of roughly 0.25ml of Dex-Moxi-Ketor (1mg/0.5mg/0.4mg/mL) 			
Potential Contraindications/Precautions	Infants and patients less than 12 Yyears of age Lactation Pregnancy	Infants Lactation Pregnancy	Infants and patients less than 12 Yyears of age Lactation Pregnancy	
Storage	Store at Room Temperature	20°C to 25°C (68°F to 77°F)		
Auxiliary Labeling	Protect from light	Store upright in original bottle	For professional use only
